Technical Experience

Technical Projects

"Luxco" Self-taught Webpage - Website Link

- Employed semantic HTML5, modern CSS, and JavaScript to create a pixel-perfect responsive experience.

- Debugged cross-browser issues and DOM rendering glitches using Chrome DevTools and device emulation tools.

Full Stack Conference Webpage - Website Link

- Built a full stack conference webpage as part of a Bootstrap course and extended functionality and design.

- Took initiative to move beyond template work by integrating advanced CSS styling techniques for a more dynamic user experience.

Work Experience

Freelance | Frontend Developer | *Feb 2025 – Present*

- Built and launched responsive web applications using HTML5, CSS3, and Bootstrap, ensuring seamless performance across devices.

- Developed interactive UI components including modals, dropdowns, and dynamic content areas to improve user engagement.

- Identified and resolved UI/UX bugs, optimizing load times and overall front-end performance for a smoother experience.

Mission Hill Church | Administrative Assistant | *Sep 2020 – Dec 2021*

- Coordinated company-wide communications, managed event calendars, and standardized digital filing systems.

- Streamlined internal operations by implementing automation tools and optimizing routine workflows.

Walt Disney World | Cosmetologist / Costumer | *Aug 2019 – Dec 2020*

- Styled and maintained wigs, costumes, and performance looks for EPCOT and Magic Kingdom live shows, ensuring show-ready quality under strict timelines.

- Collaborated with performers and backstage crews to execute quick changes, troubleshoot issues on the fly, and deliver flawless presentations under pressure.

Education
